1 Build the zoo
2 Two tasks
3 Defenders
4 Scoring
120 small CNNs
CIFAR-10, 24,234 weights
60 clean, 60 poisoned:
a corner patch sends any
image to a target class
40 evaluated, 80 train
the meta-classifier
Ground-truth key
backdoored? pattern, corner,
size, target class
hidden from all defenders
Detect (read only)
in: the weights only
out: backdoored? target?
trigger pattern, corner?
Remove (read + write)
in: weights, 1,000 clean
images, 50 forward passes,
no gradients, no triggers
out: edited weights
LLM, one call
Nemotron 3 Ultra / 3.5 VL
Baselines
heuristic, meta-clf., NC
LLM agent + sandbox
Nemotron 3 Ultra
Baselines
prune, fine-tune,
fine-prune, NC unlearn
Detection scores
AUROC on 40 models
target / pattern / corner
right on 20 poisoned
Removal scores
real trigger on 9,000
held-out images:
attack success (lower
is better), clean accuracy
used only by the scorer
